Assembly Instructions

Case includes: Removable divider to separate graphic panels, lid with foam lighting insert, strap and case conversion top.

1 Open the two latches on the back of the case.

2 Repeat with the front latch. Remove the lid and put to one side until the contents are packed / unpacked.

3 The bottom of the case contains a removable divider to separate the graphics from the pop-up frame.

A The lid is supplied with a foam insert to house the lights. Held in place with conversion top and strap.

B Unfasten the strap to access the foam insert.

C Lift the conversion panel out of the lid. Once the lights have been removed re-fasten the strap and place the lid onto the base.

D Place the conversion top onto the lid of the case, fixing in place with hook and loop fastener.

Other transit cases in our range include:

Elipse Case

Cost effective case to transport pop-up frame and graphics. Wheeled for easy transport. Suitable for a 3 x 4 pop-up.

2 Part Oval Case

Extremely durable pop-up case for frame and graphics. Splits into two parts making it easier to manoeuvre into tight spaces or car boots. Suitable for a 3 x 4 pop-up.

Wheeled D Drum

Constructed from tough yet lightweight polypropylene. Foam lined for added protection. Complete with carry handles and wheels for easy transportation. Suitable for a 3 x 4 pop-up.
